CERTIFICATION OF ADHD DISORDERS

The student named below has applied for services from the Student Disability Resource Center (SDRC) at UC Riverside. In order to determine eligibility and to provide services, we require documentation of the student's disability and specific impairments from a reliable source in order to conduct an individualized assessment of accommodation needs. Under the Americans with Disabilities Act as Amended (ADAAA) of 2008 and Section 504 of the Rehabilitation Act of 1973, individuals with disabilities are protected from discrimination and may be entitled to reasonable accommodations. To establish that an individual is covered under the law, documentation must indicate that a specific disability exists and that the identified disability substantially limits one or more major life activities. A diagnosis of a disorder in and of itself does not automatically qualify an individual for accommodations. The documentation must support the requested accommodations.

Please return completed form to sdrc@ucr.edu. The information you provide will not become part of the student's academic records, but will be kept in the student's file at SDRC, where it will be held in accordance with federal laws regulating privacy of student records. This form may be released to the student at their request. In addition to the requested information, please attach any other information you think would be relevant to the student's academic adjustment. Please contact us if you have questions or concerns. Thank you for your assistance.
